**Portfolio:** <https://delgaudiomike.com> | **LinkedIn:** /michael-delgaudio | **GitHub:** /mikedelgaudio

## OBJECTIVE

Junior computer science student with over a year of industry experience - looking to leverage my previous knowledge as a front-end developer in e-commerce and automated testing solutions to take initiative, incorporate new innovations, and build efficient solutions a wide variety of front-end experiences. With my high motivation and hunger to learn new technologies, I believe in being a valuable asset to the team.

## EDUCATION

**Stevens Institute of Technology** | Hoboken, NJ

Expected May 2023

Bachelor of Science in Computer Science

**GPA:** 3.54 | **Awards:** Edwin A. Stevens Scholarship, Dean's List

**Related Coursework:** Data Structures, Algorithms, Systems Programming, Agile Methodologies

## PROFESSIONAL EXPERIENCE

**Colgate-Palmolive Company** | Piscataway, NJ

January 2020 – Present

Application & Software Developer Co-Op

- Streamlining an issue tracking system on GitHub while developing Angular components on the front-end team for the new Hill's eCommerce B2B site, ensuring visibility to stake holders on the status of the project
- Coordinating with lead DevOps and Architecture team to implement automated testing pipelines with Git Actions to ensure 95% reliability for the Hill's eCommerce B2B customers
- Established an open-source professional networking Angular webapp for interns, allowing employees to learn and connect with current and future interns
- Hosting training workshops for interns on Angular, Bootstrap 4, Docker, and PostgreSQL to provide opportunities and initiate passion projects throughout the company

**U.S. Southern District of New York Probation** | New York City, NY

June – August 2019

Web Developer Intern

- Developed an internal directory website providing probation officers with all critical contact information for their clients by using back-end tools such as PHP and MySQL database
- Collaborated with senior IT management and Deputy Chief U.S. Probation Officers to craft a new public website design replacing the outdated website by creating wireframe mockups in Adobe Photoshop
- Overcame challenges to ensure responsive webpages for clients and officers to have a positive user experience on any device or web browser using front-end technologies such as Bootstrap 4, JavaScript, and jQuery
- Converted current and future development projects to use Git version control which resulted in our development team to meet the strict go live date for the new public website

## PROFESSIONAL DEVELOPMENT

- **Cloud:** AWS EC2, AWS Lightsail, CloudFlare, GCP CloudSQL, GCP Storage, GCP Kubernetes
- **Creative:** Adobe Photoshop, Final Cut Pro X, Adobe Creative Cloud
- **Development Tools:** Docker, Postman, DBeaver
- **Frameworks & Databases:** Bootstrap 4, NodeJS, Angular, ExpressJS, Selenium, Cucumber.io, SAP Spartacus, PostgreSQL

**Programming:** HTML, CSS, Java, Git, JavaScript, TypeScript, Bash, Python, C++

## MEMBERSHIPS & INTERESTS

**Stock Evaluation Website** | (*Website Development*)

Created a responsive website with roommate to access any given stock by pulling financial data from company SEC Filings. Through the use of an API, financial data is called for, then used a variety of calculations to produce a score.

**Stevens Peer Tutor & Chinese Student Association Member, UX Wireframe Design (Sketch & Dojo), Technical Writer, Automated Testing, PC Building**

U.S. Citizen | Available to Work: May – August 2021
