**Portfolio:** <https://delgaudiomike.com> • **LinkedIn:** <https://bit.ly/36SVM5K> • **GitHub:** <https://bit.ly/36WcvoF>

## EDUCATION

**Stevens Institute of Technology**, Hoboken, NJ

Expected May 2023

Bachelor of Science in Computer Science

**GPA:** 3.65 / 4.00 • **Awards:** Edwin A. Stevens Scholarship, Dean's List

**Related Coursework:** Data Structures, Algorithms, Systems Programming, Agile Methodologies

## TECHNICAL SKILLS

- **Cloud:** Docker, Cloudflare, GCP CloudSQL, GCP Kubernetes, REST APIs, GitHub Actions
- **Creative:** Adobe Photoshop, InVision
- **Frameworks:** React, Angular, NextJS, NodeJS, Selenium, PostgreSQL

**Programming:** HTML, CSS, JavaScript, TypeScript, Java, Python, Bash, Git

## WORK EXPERIENCE

**Colgate-Palmolive Company**, Piscataway, NJ

January 2020 – Present

Application & Software Developer Co-Op

- Developing reusable Angular components which saves a third of extra development time for common e-commerce UI functionality
- Coordinating implementation of automated testing pipelines to Google Cloud Platform with GitHub Actions to ensure 95% reliability for Hill's B2B customers
- Evaluating B2B site against WCAG guidelines for users with disabilities and advancing its compliance to 90% coverage using ARIA relationships or typography changes
- Established an open-source full stack application with Angular, Express, and PostgreSQL for professional networking between interns and all employees during COVID-19

**U.S. Southern District of New York Probation**, New York, NY

June – August 2019

Web Developer Intern

- Converted web projects to use Git version control which saved 25% of development time to meet the strict production date for the new public website
- Overcame front end challenges to ensure proper webpage behavior for clients on any device or web browser using technologies such as Bootstrap, JavaScript, and jQuery
- Implemented Google Analytics on public website to gather job listing popularity which allowed for promoting listings or performance indicators on candidates

## PROJECTS

**Stock Evaluation Website**, <https://bullishbay.com>

Created a full stack responsive website and backend service to access any given stock by pulling financial data from company SEC Filings. The application then utilizes a variety of characteristics to produce a score.

**Portfolio Website**, <https://delgaudiomike.com>

Developed a responsive web application in Angular to showcase personal projects, work experience, and software skills. Additionally, added in GitHub Actions to deploy new code to web server autonomously.

**Financial Discord Bot**, <https://github.com/mikedelgaudio/Bullish-Bay-Discord-Bot>

Implemented a chat bot using the Discord API and NodeJS that users can interact with for daily Wall Street news updates or provide the latest financial stock data of a company.

**WeatherFlash**, <https://github.com/mikedelgaudio/WeatherFlash>

Prototyped a NextJS application that provides users a friendly weather UI from the OpenWeatherMap API based on their location or by requested city.
